

# eSDScom: ways, strategies and status quo in digital compliance

*BDI Conference on eSDScom*

With ECHA having supported the shift to XML-based safety data sheet transmission back in 2019, every actor in the chemical supply chain is still waiting for further decisions before larger investments take place. Requirements and technologies are well known, but solutions are shaped by large-scale systems of high complexity. Participate in this workshop to learn how eSDScom prepares, including aspects of implementation costs as well as interoperability with other data exchange scenarios and legacy document-based solutions.

**08:30 Web dial-in (for online participants)**

**09:00 Welcome**

Thomas Holtmann

BDI – Federation of German Industries

**09:15 Aspects of Electronic Data Exchange**

Christoph Attila Kun

BASF

**09:45 Digitalisation for SME resilience**

How digitalization can support SMEs considering the new requirements of the Green Deal; regulatory and technical requirements faced by SMEs.

Marco Borgmann

DUCC/Follmann Chemie

**10:00 Discussion/Break**

**10:30 PDF-Converter Tools**

Results of the last Workshop: Export options, data completeness, errors and mapping

Dirk Henckels

Qualisys

Presentation of further tools and features

Selected Companies

**12:00 Lunch Break**
